

On the occasion of 125 years of X-ray
Radiographers' Association of Maharashtra, Mumbai Unit
organises

22nd National Conference of Society of Indian Radiographers

at Ravindra Bhavan, Margao, Goa on 7th - 8th November 2020

Invitation

Dear Colleagues,

It gives us great pleasure in inviting you to attend the 22nd National Conference of Society of Indian Radiographers (SIR).

Society of Indian Radiographers celebrates “125 years of X-rays”.

Today it's common place, but at the time it was a medical-technical revolution - the discovery of X-rays by Wilhelm Conrad Roentgen 125 years ago in Würzburg. His discovery on November 8th 1895 heralded a new era in medicine that provided previously unknown insights into the human body.

Wilhelm Conrad Roentgen, who taught in Würzburg as a physics professor, discovered the rays he himself used the term X-rays by accident while experimenting with gas discharges produced in a glass tube with two molten electrodes. The resulting glow can be observed with the help of a fluorescent screen. When he wrapped such a glass tube in a light-proof manner and darkened the room, he noticed by chance that a fluorescent screen next to the tube began to glow in the dark, even though the tube was wrapped to not emit any visible light. He increased the distance, but the radiation appeared unchanged, only platinum and lead could stop it. Eventually he held his hand in the rays and saw the shadows of his hand bones on the fluorescent screen. As proof, he recorded his discovery with the help of photography. This was the birth of X-ray technology.

Today, X-ray technology is the basis for imaging in many medical devices and is therefore an integral part of everyday life. Society of Indian Radiographers is taking the 125th anniversary as an opportunity to honor Wilhelm Conrad Roentgen's ground breaking discovery, which has positively changed people's lives, appropriately we have made with a comprehensive theme for the conference as “125 Years of X-rays”.

Radiological - Technology has reached frontiers never imagined before & one need to constantly up-date date to be competitive in our day to day practice. We have invited galaxy of experts to update our skills.

Radiological-Technology is a combination of Science & Art and needs a perfect setting to be best imagined. We therefore invite you to share your technical & practical experiences with a very interactive faculty & enhance your artistic imaging skills.

We the members of the Organizing Committee, look forward to your participation. We urge you to register at earliest possible & send your scientific contributions well in time to ensure better planning of the event.
